Vehicle Engineering

Vehicle Modifications

GVM & GCM Upgrades

## Benefits of the Omega Vehicle Upgrade

- Engineered, tested, certified and approved as a commercial vehicle
- Second Stage Manufactured (SSM) pre-registration
- Upgraded vehicle with greater carrying capacities
- Total cost is less than an equivalent vehicle provided post-registration

Ideally suited to:

- Carrying and keeping sensitive equipment or tools free from dust
- Safely carrying a decent payload in the vehicle and trailer
- Providing secure storage for your tools and equipment

### TANAMI (5 seat model)

Kit includes suspension modifications, removal of components, fitting of toolboxes, placement of barriers and additional safety components giving you:

- GVM upgrade to 4000kg
- Towing capacity 3500kg
- Combined payload of 3800kg
- Carry crew and still have capacity for 1000kg of tools and equipment
- GCM upgrade is available to maintain towing capacity

### STRZELECKI (2 seat model)

Kit includes suspension modifications, removal of components, and adding safety components giving you:

- GVM upgrade to 4000kg
- Towing capacity 3500kg
- Combined payload of 3800kg
- Additional internal storage capacity of 3000L
- GCM upgrade is available to maintain towing capacity

Also available: GVM upgrade pre- or post-registration without further modifications (*DESERT* kit)

### Give us a call

Ordering your vehicle is facilitated by our Engineers and is as easy as:

1. Buying the Omega model kit; and
2. Purchasing the vehicle

Our Engineers organise the fitting and certification, and provide assistance with registration of the vehicle
